

ASSA ABLOY

Identification Technologies

## ***ASSA ABLOY Identification Technologies***

ASSA ABLOY Identification Technologies (ITG) is a leader within the ID management and Radio Frequency Identification (RFID) markets. The company develops, manufactures and markets RFID components, products, and services for seven market segments which are: Government, Financial Transactions, Public Transport, IT & Corporate ID, Access & Security, Industry & Logistics, and Food & Animal.

For the industrial and logistics market segment, which is highly diversified in terms of technical requirements, ITG provides a comprehensive portfolio of standard and customized RFID transponders as well as OEM reader modules. System integrators and OEM partners can choose the optimum combination of frequencies (LF 125kHz, HF 13.56MHz, UHF 869/915MHz), form factors and technical features to enable contactless state-of-the-art track & trace systems.

ASSA ABLOY ITG is a merger of ACG Identification Technologies, Novacard do Brasil, OMNIKEY, Sokymat and VisionCard. The company has more than 900 employees and 25 sales offices on all continents. The headquarters are located in Walluf, Germany. Assa Abloy ITG is part of the Global Technologies Division of the Swedish ASSA ABLOY Group.
