

## Testimonial „March Report“

PE INTERNATIONAL GmbH  
Michael Spielmann, Phd  
January 11, 2008

“Within more than 3000 projects with market and branch leaders in various industrial sectors, including the IT-sector itself, we used our IT-solutions and database to determine environmental and carbon footprints of products and services. This quantification has been the foundation to determine reduction potentials and hence help companies to increase their environmental performance within their supply chains and product life cycles. Our experience demonstrated that a sound quantification is the key to a successful carbon management. We are delighted to share our experience and contribute to this report being produced by the council dealing with the role of IT as a solution provider to the supply chain for effective Carbon Management.”

---

On PE INTERNATIONAL GmbH:

Sustainability is the path towards corporate actions with a view to the future and a more livable environment. Since 1989, PE International has been supporting companies all over the world who want to go down this path consistently. Today, the company is a global leader in strategic consulting, software systems, and comprehensive services related to sustainability issues. The methods we use include, for instance, the implementation of management systems, the development of sustainability indicators, lifecycle analyses, ecology reports, carbon footprints, environmental product declarations, technological benchmarking, eco-efficiency analyses, energy efficiency, and emissions management.

PE International also offers two leading software solutions: GaBi for product sustainability and SoFi for corporate sustainability. More than 500 corporations and institutes worldwide trust the consulting services and software solutions of PE International, including such market and industry leaders as Alcan, Allianz, Bayer, DaimlerChrysler, Deutsche Post/DHL, Rockwool, Siemens, Toyota, ThyssenKrupp and Volkswagen. PE International has regional offices in Stuttgart, Vienna, Tokyo, Taipei, Perth, Boston, and Kuala Lumpur.
