

Press Release

SAP, the market and technology leader in business software solutions has joined the European Supply Chain Institute's (ESCI) 'Supply Chain Carbon Council'.

The Carbon Council set up in 2007 is tackling the issues of carbon management and reduction with global innovators in technology solutions.

SAP is joining the 'Supply Chain Carbon Council' (SCCC) to take a lead role within the Key Technology Group along with IBM, Promise Innovation, Motorola, PE International, and the Carbon Disclosure Project.

In welcoming SAP onto the SCCC, John Connors, CEO of the European Supply Institute outlined the challenges ahead for the council "Reduction, management and compliance are the key areas for the council. SAP through their emissions management software is a leading innovator and solution provider in these areas to a range of businesses.

The Council will also work closely with their solution and integration partners in finding technology based solutions to the global carbon issue."

Headquartered in Walldorf, Germany, SAP is the world's largest business software company – with more than 51,200 employees at sales and development locations in more than 50 countries worldwide. SAP will be an active member in the European Supply Chain Carbon Council and contribute its experience gathered during more than 35 years of software development in more than 25 industries.

SAP provides a world-class technology platform and wide range of supply chain applications like SAP Advanced Planning & Optimization, SAP Transportation Management, SAP Extended Warehouse Management, and SAP Supply Network Collaboration. This unique combination of technology platform and business applications allows SAP customers to calculate their carbon footprint and start initiatives aimed directly at lowering their emissions to become truly sustainable organizations.

SAP leadership views 'Green' as a corporate responsibility and is looking forward to collaborating with other organizations to provide solutions for the future.

For further information and access to John Connors, CEO please contact the Communications Department at the ESCI carboncouncil@escinst.org

Additional Information: The ESCI is a member body that researches areas that will have a direct and positive impact within the supply chain. The membership of the Institute is predominantly at management level and is drawn from a wide range of industry sectors.
