

ProcServe Working with Green 2020 to Lower CO2 Emissions in Procurement and the Supply Chain

eProcurement Company Going Green through Partnership with Environmental Consultancy

March 2008, LONDON, UK - ProcServe, a leading provider of procurement and marketplace connectivity solutions, today announced that they have partnered with Green 2020, a specialist environmental software consultancy, to drive lower emissions in procurement processes for customers and their suppliers

Green 2020, a specialist supply chain environmental software company, provides expertise in the development of environmental policy, environmental management systems, carbon management systems, real-time energy monitoring and carbon foot print calculation and performance certification at both organisation and product level.

Green 2020's particular expertise is CO2 emissions reduction in procurement and the supply chain and is working with ProcServe to help measure and improve the environmental performance of both buyers and suppliers. As an added value service to ProcServe's procurement service Green 2020 are providing solutions to help buy side and supply side organisations reduce energy use, measure and reduce carbon emissions and ultimately save money.

Philip Emsley, Chief Operating Officer at Green 2020, commented "We are very excited to be working with ProcServe to be able to offer our environmental services to both buying and supplying organisations. The bringing together of an electronic Marketplace platform and an Environmental Performance Improvement service will be the first of its kind and will ensure that organisations both large and small are working together to lower their carbon footprints and improve their environmental performance"

Veera Johnson, CEO, ProcServe said "With ProcServe's growing presence on the global arena of Procurement based eCommerce, for us to be able to provide an environmental management service to our global customers and suppliers is not only a bonus but it is our responsibility to help make a significant contribution to the Climate Change agenda. A purchasing decision is the first stage of the carbon emission lifecycle and if we can encourage our clients to purchase with and from suppliers with minimal environmental impact then we will be making a significant contribution to help reduce global emissions".

About Green 2020

Green 2020 is a specialist supply chain environmental software company helping organisations in the public and private sectors to save money and reduce their carbon emissions. Green 2020 are assisting global companies by developing environmental policies and strategies, reducing energy bills through the use of real time monitoring and measurement software, by deploying environmental performance measurement and carbon management solutions within the supply chain and through the deployment of our carbon footprint online measurement and reporting tool, Carbonalysis.
