

Corporate Profile

About Sun Microsystems, Inc.

Since its inception in 1982, a singular vision -- "The Network Is The Computer" -- has propelled Sun Microsystems, Inc. (Nasdaq: SUNW) to its position as a leading provider of industrial-strength hardware, software and services that make the Net work. Sun can be found in more than 100 countries and on the World Wide Web at <http://sun.com>

About Sun Microsystems' Work With RFID

Sun Microsystems' industry-leading, standards-based, RFID solution is a comprehensive end-to-end offering that includes hardware, software, services and best-in-class partnerships. For over three years Sun has been working to make RFID technology an extension of web services and a seamless part of software infrastructure such as Sun Java Enterprise System. Sun has been a leading member of and advisor to the MIT Auto-ID Center - the driving force for auto-ID standards, and has participated in numerous successful pilots and deployments. Sun is opening RFID Test Centers around the world to help test their RFID implementations before they invest - from tagging products, integrating data into back-end systems and sharing this data with supply chain partners. For more information on Sun's leading role with RFID visit <http://www.sun.com/rfid> . To start testing in a Sun RFID Test Center and learn how to get the competitive advantage necessary, email rfid-testcenter@sun.com today.
