

TOSHIBA TEC Europe has earned a reputation as a leading manufacturer of retail and industrial information systems through product development that aims to anticipate and uncover potential customer needs, resulting in products that provide real value and benefits to the user.

As a total solution provider, TOSHIBA TEC Europe offers a complete package from consulting and system design to system installation, operation and maintenance of electronic point of sale systems, electronic cash registers, electronic scales, barcode printers, dot matrix printers, peripherals and software information systems.

Maintaining this philosophy TOSHIBA TEC are producing products and solutions to allow the seamless integration of RFID technologies into its current and future systems. The first step in this area will be the launch of an upgrade kit for the new SX barcode printers. This flexible approach will allow the products supplied now to follow the trends and innovations in this developing field.

A member of the TOSHIBA TEC Corporation, TOSHIBA TEC Europe has financial stability from one of the world's leading technology companies, while still retaining the high levels of customer service and efficiency usually associated with smaller organisations.

TOSHIBA TEC Corporation has a global turnover of 300+ billion yen through 72 offices, employing over 13,000 people.
